## Vietnam

### Rice Price - Weekly

**2010**

**Approved By:**

Michael Riedel

**Prepared By:**

Quan Tran

**Report Highlights:**

Due to the newly harvested Autumn rice crop's inferior quality, export prices of the higher quality rice, 5 percent and 10 percent broken, were slightly up last week. On the other hand, 15 percent and 25 percent broken rice prices went down slightly, due to the prevalence of these kinds of rice on the market.

Despite the current peak harvest of the Autumn crop in the Mekong River Delta, newly harvested paddy prices stayed unchanged last week. The government's rice purchase program is likely the main factor keeping paddy prices from going down during the peak harvest.
